

INTEGRATED LABELS

An organization that wants to **combine a business form with a label product** can benefit from our **new integrated label form.**

APPLICATIONS FOR INTEGRATED LABELS ARE AS FOLLOWS

- **Warehousing and distribution**

Product labels allow for quick identification. Warning labels attached to dangerous substances help promote safe handling of products.

- **Health care**

Form/label combinations which use the latest in electronic imaging and bar coding technology create endless opportunities, including patient identification, specimen vials and pathology analysis.

- **Retail and fulfillment**

Shipping and/or product labels are needed for mail order or traditional retail prescription drug operations, retail consumer catalogues, office supply retailers and mail order film processing labs. A preprinted return authorization and label gives mail order operations a competitive edge.

- **Non-profit associations**

Keeping expenses in line is very important to non-profit groups, who can use the integrated self-label to reduce processing costs. Now instead of producing a separate label or response mechanism, they can use the integrated self-label to print a label or name tag with other information all in one step.

- **Membership cards**

Letter and card can be combined on the same form and are laser printer compatible.

- **E-commerce applications**

Ideal for an invoice and shipping label to be generated by the customer at the same time.
